

SURIYA SIVANANDAM

Associate Software Engineer II | Full-Stack & Backend Engineer | AI/LLM Systems

Chennai, Tamil Nadu, India | +919789412582 | sivanandam.suriya@gmail.com

Portfolio: <https://sivanandam-suriya.vercel.app/>

PROFESSIONAL SUMMARY

Associate Software Engineer II with 4+ years of experience building full-stack web and mobile applications, specializing in backend engineering, scalable SaaS platforms, and AI-enabled systems. Experienced with TypeScript, React, Next.js, Node.js, NestJS, PostgreSQL, Redis, AWS, Docker, REST APIs, multi-tenant architecture, background processing, authentication/RBAC, RAG, AI agents, and MCP. Strong experience translating business requirements into production-ready features across frontend, backend, database, cloud, and AI layers.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Dart

Frontend: React.js, Next.js, Angular, React Native, Flutter, Tailwind CSS

Backend: Node.js, NestJS, Express.js, REST APIs, WebSockets, Server-Sent Events, OpenAPI/Swagger

Databases: PostgreSQL, pgvector, MongoDB, MySQL, Redis, TypeORM

AI / LLM: LLM Integration, RAG, AI Agents, LangChain, LangGraph, MCP, Prompt Engineering, OpenAI, n8n

Cloud / Architecture: AWS, Docker, CI/CD, CloudWatch, Multi-Tenancy, Event-Driven Systems, Background Jobs, RBAC, JWT **Tools:** Git, GitHub, Bitbucket, Jira, ClickUp, Postman, TablePlus, VS Code

PROFESSIONAL EXPERIENCE

Associate Software Engineer II — TESARK Technologies, Chennai | Aug 2022 – Present

- Design and develop full-stack SaaS applications using React, Next.js, TypeScript, Node.js, and NestJS, translating business requirements into production-ready features.
- Engineer schema-per-tenant PostgreSQL architectures for tenant isolation, privacy, and independent data management across multi-tenant applications.
- Design REST APIs with JWT authentication, role-based access control (RBAC), session management, API security, and OpenAPI/Swagger documentation. Implement asynchronous and event-driven workflows using Redis and BullMQ, including background jobs, retries, priority handling, concurrency controls, and audit logging.
- Develop AI-powered features integrating LLMs, RAG pipelines, LangChain/LangGraph workflows, MCP servers, and custom AI-agent architectures.
- Build real-time workflows using WebSockets and Server-Sent Events (SSE), and support production deployments with AWS, Docker, CI/CD, and CloudWatch.

Trainee Engineer — TESARK Technologies, Chennai | May 2022 – Jul 2022

- Completed full-stack engineering training and contributed to internal applications using React, Node.js, TypeScript, REST APIs, Git, code reviews, testing, and Agile development.

SELECTED PROJECTS

Blog Smith — AI-Powered Multi-Agent: Built a 10-node LangGraph workflow that converts unstructured thoughts into technical blogs using specialized extraction, outlining, writing, editing, and media-planning agents. Implemented style-aware RAG with OpenAI embeddings and PostgreSQL/pgvector, plus real-time SSE progress streaming.

Lendora — Multi-Tenant Money lending platform: Built a schema-per-tenant lending platform with loan calculation and repayment workflows, digital contracts, KYC/bank verification, payment integration, document management, notification

HumaizeSQL — Natural Language: Built an LLM-powered interface that translates natural-language requests into SQL/MQL across PostgreSQL, MongoDB, and MySQL, with read-only provisioning, encrypted credentials, query

RAG Knowledge Base: Built a document-to-RAG pipeline supporting PDF, DOCX, CSV, Markdown, text, and web URLs with chunking, OpenAI embeddings, pgvector similarity search, context-grounded responses
